

AARAL AGRAWAL

B.Tech Computer Science Student
aaralagrawal7@gmail.com — +91 8107260988 — Tonk, Rajasthan
github.com/Aaral-Agrawal — linkedin.com/in/aaral-agrawal-4a3b99283

Summary

3rd-year Computer Science student with strong skills in full-stack development, AI-powered applications, and data structures algorithms. Experienced in building scalable MERN and AI-based projects through hackathons and academic work. Passionate about software engineering, problem solving, and developing impactful real-world applications.

Education

B.Tech in Computer Science — Banasthali Vidyapeeth, Rajasthan 2023 – 2027
CGPA: 8.9/10
Relevant Coursework: DSA, Operating Systems, DBMS, Algorithms, Computer Networks

Experience

Hackathon Developer — **Hack Celestia** 2024

- Built an AI-based solution within 48 hours, achieving 2nd place among 50+ competing teams.
- Contributed to system design, integration, and final presentation.

Projects

VokMock – AI-Powered VR Interview Platform — GitHub *Three.js, WebXR, MongoDB, OpenAI LLM*

- Built a VR and web-based interview simulation system supporting 20+ mock interview scenarios.
- Integrated OpenAI LLM and Whisper for automated questioning, speech-to-text analysis, and feedback generation, improving response clarity by 30%.

RAAGAX:Music Note Detection Model — GitHub *Python, ML*

- Developed an AI model for musical-note detection with 85% accuracy on 20+ audio samples.
- Enabled real-time note visualization, cutting transcription time from 10 mins to under 2 mins.

HVAL – Human Evaluation of Machine Translation System — GitHub *MERN Stack, NLP, JWT, Chart.js*

- Built a web-based platform for evaluating machine translation outputs using human scoring metrics like fluency, adequacy, and ranking.
- Implemented role-based authentication (Admin, Evaluator, Researcher) with dataset management and analytical reporting features.

Financial Data Extractor App — GitHub *Python, Streamlit, OpenAI*

- Used OpenAI models to extract financial insights from 50+ articles with 85% accuracy.
- Created a Streamlit dashboard that cut manual reading time by 70%.

Technical Skills

Programming: C, C++, JavaScript, Python, SQL
Frontend: React.js, HTML5, CSS3, Responsive Design
Backend: Node.js, Express.js
Database: MongoDB
Concepts: DSA, OOP, DBMS basics
Tools: Git, GitHub, VS Code

Certifications

- Deloitte – Data Analytics Virtual Experience (2025)
- Deloitte – Technology Virtual Experience (2025)
- Goldman Sachs – Operations Virtual Experience (2025)

Achievements

- 2nd place – Hack Celestia Hackathon for AI-based solution.
